It refers to a mature, manly behavior in which a man is not concerned with sexual gratification. One needs to maintain continence only during the period of transition of puberty to adulthood, when a young man's desire for sexual intimacy can easily be used to tempt him. It is defined as the practice of remaining a celibate until the time of death. It refers to being sexually abstinent until the time of death, not a religious practice or martial art. Brahmacharya is sometimes colloquially called "sexual continence", "sexual self-restraint", or "sexual abstinence", but can also be called "sexual temperance". It is also sometimes called "Vichaika" in Sanskrit, which has different meanings including "chastity", "temperance", "virtue", or "sexual restraint". "Brahmacharya" is often used to refer to something particular to Hindu culture, but it is not exclusive to any particular religion or philosophy. Brahmacharya is considered to be part of the broader Vedic codes of conduct, such as those outlined in the Atharvaveda, and in the epic text, the Mahabharata.
