Site Planning How does it work? AutoCAD requires a computer running Microsoft Windows or macOS and Autodesk's AutoCAD application installed. The process of creating a drawing in AutoCAD is relatively simple. Once the program has been downloaded, it is usually automatically installed and a desktop icon created. Then the user can open the application and draw using an on-screen guide or, if desired, by using the keyboard. Autodesk's AutoCAD is a powerful and feature-rich piece of software that can be used by hobbyists, engineers, architects, carpenters, electrical workers, builders, and others. The following sections discuss the different features available in AutoCAD. Drawing A simple drawing can be made in AutoCAD using a geometric shape such as a rectangle, circle, ellipse, or polyline. Points can be added to form a line and curves can be added to create a 3D model. The text, color, and pattern

I need to remove the values from a textbox, and values from an array, and the selected value from an array. I do not need to delete the data from the array. Here is the form array: Here is the textbox that needs to be removed Here is the textbox that needs to be deleted Here is the values to be removed from the album's array some other text This is my jquery code: `var ary = $('#albums').serializeArray(); var album = []; album[8] = ary.name; album[8].value = ary.name; $('#input[type=text]').remove(); $('#input[type=checkbox]').remove();` How can I remove these values? A: Your code is correct except that your selector is wrong. Change the following line to `$('#input[name=albums[8][name]]').remove();` Working Demo A: `$('#input[name=albums[8][name]]').val("");` is probably what you want. (IE8+) you'll get `serializeArray()` if you use the one below.

```
$('#input[name="albums[8][name]"]').serializeArray(); /* * Copyright (c) 2018 THL A29 Limited, a Tencent company.
