The product is owned by Autodesk, Inc., a developer and publisher of design software and services. The original owners of the AutoCAD brand were Autodesk International (until 1996), and then Autodesk, Inc. (from 1996 to the present). The current CEO and President of Autodesk, Inc. is Andrew Anagnost. The first version of AutoCAD, released in 1982, only ran on PCs, and only provided functionality for vector graphics. In 1989 the product was first released on a diskette (35mm) as a DOS-based Windows 3.1 application. This version was only available in the US and Canada. In 1992 the 32-bit, multitasking, DOS version was released for the IBM PC platform. The design of AutoCAD started in 1981, with work by Alan Sircom, a programmer for Autodesk, on the control structure of CAD and drafting. On January 12, 1982, Autodesk began producing AutoCAD on minicomputers, as opposed to using the time-consuming MicroCompress program on minicomputers. Autodesk released their first version of AutoCAD as the DeskCAD program for MS-DOS on floppy disks. It was produced with financial support from Digital Research and International Business Machines (IBM) in Austin, Texas. AutoCAD was later ported to MS-DOS, and for Windows. The user interface was also greatly improved in 1989, when Sircom left Autodesk, and a new interface design team was assembled. At the end of 1995 Autodesk released a completely new version of AutoCAD, named AutoCAD R12. It is now the current version, with AutoCAD 2014. Following the early port to Windows, Autodesk introduced the concept of multi-user versions of AutoCAD in 1987. In this version, each customer could use one of several licensed AutoCAD versions in a network environment. This model has since been taken up by the other CAD programs, notably MicroStation and Inventor, which are multi-user in the same way. The first user to use a licensed copy of AutoCAD was Alan Sircom, who was a programmer for Autodesk. Sircom was looking for a home to use AutoCAD, and had a friend in Austin, Texas, who owned a PC. Sircom was able to access the computer and he began designing his own home.
