following do in this code? `struct foo {`
`int a; int b; int c; int d; int e; }; struct`
`foo foo_c; struct foo foo_d; foo_c =`
`{ 1,2,3,4,5 }; foo_d = foo_c;` what is the
meaning of each of the following? `a = 1`
`b = 2 c = 3 d = 4 e = 5` A: `a = 1 b = 2 c`

= 3 d = 4 e = 5 Read from right to left:
Set a = 1 Set b = 2 Set c = 3 Set d = 4
Set e = 5 If this makes no sense, you
might need to explain a little more what
you are trying to achieve. A: struct foo
foo_c; struct foo foo_d; foo_c =
{1,2,3,4,5}; foo_d = foo_c; foo_c =
{1,2,3,4,5}; foo_d = foo_c; foo_c has
the values 1,2,3,4,5 foo_d has the same
values, as foo_c This will do whatever it
is you want it to do Chet Huber Chester

Installation of the Avpair plugin needs the following folders to be in the same folder as Autocad.exe: Win\system32
Win\SysWOW64

Win\autocad\extern\ipw\acad Autocad and the required folders must be on the system PATH. In order to be able to use the keygen, you need to add the following directory to your Autocad.ini: "software\autocad\extern\ipw\acad\keygen" A keygen is in the bin directory which is a subdirectory of the extern directory. Example Autocad 2012. It appears to be working without any problems. No plugins are needed. ##
