What's New In MatrixMania Screensaver?

MatrixMania Screensaver is a tool that displays famous falling code from the "The Matrix" movie. - Multi-coloured "Matrix" falling code - Full screen mode - Simple one click install - Multi language supported - Adjustable Noise, Balance, Density, Inversion levels - Clean installation instructions provided - No extra hardware or software needed - Sound is disabled by default Here's what users have to say about MatrixMania Screensaver: "A great visual screensaver for 'The Matrix' fans! Great job!" "Installed a couple of minutes ago and already tested the maximum settings, it's amazing. The whole screen turns to a single color, and the scene is excellent." "Another amazing screensaver." "Just installed the screensaver, very nice, clean and professional. Nice job." "The only software I've found that is able to represent the falling code with proper detail and maintain that amazing green color." Screenshots Publisher's Description Get to know the Matrix's world before the release of the film "The Matrix". This well-known movie is set in a real future where humans live in a virtual world called "The Matrix". You can travel in this virtual world by using "sliding" on "Tiles" or pressing the keys "F1" to "F12". Just start this screensaver and your computer will be taken by a code-sliding world. If you access "Screen Saver Settings", you can change the sound and other options. MatrixMania Screensaver comes with many high quality themes (colors) and much more features to enjoy! MatrixMania Screensaver is the "thin" version of the "The Matrix" movie (not the "real" version). The movie is about the humans of "The Matrix". They live in a virtual world where "everything is blue", they drink "special coffee" and they die when the "receptors" in their brains are destroyed (sadly, not too different from the "real" version). Installation Information MatrixMania Screensaver is a free software application from the Games subcategory, part of the Games > Simulation > Screensavers

System Requirements:

Windows Vista, Windows XP, or a 64-bit version of Windows 7 Mac OS X 10.4.8 or higher 4 GB of RAM (8 GB recommended) 2 GB of free disk space 1 GHz or faster CPU DirectX 9.0c-compatible video card Tomb Raider: Definitive Edition A keyboard and mouse are also recommended Note: In order to see the minimum requirements, try this tutorial by Brian Ashton.
