I have many tools, programs, applications and files I have to backup, but I don't know any that can duplicate the best features of Total Commander. Total Commander was easy to use, it was fast, and it had many features that made it very easy to access, organize, backup, encrypt, compress, and other things that you would want to do. However, Total Commander isn't supported anymore. I don't know of any good apps that offer all the features of Total Commander. I know some things are available in Android, but they aren't very user friendly. For example, they may not have a "Copy" menu option. You would have to use the "Duplicate File" function, and that just doesn't work that well. A lot of apps have a "duplicate" function, but not all of them offer the ability to select the original and the duplicate file and create a new one. Total Commander used to offer that ability, but I can't remember if it still works in any apps. If you have a good app, please let me know. The app I have on my phone is called "Duplicate Files", but I just don't think it is as user friendly as Total Commander. ATTENTION! If
