****MSU Stego Video VirtualDub Video Plugin.** Data that you hide can be recovered even from compressed video, or if the video was compressed again by another codec! We smartly change video with understanding how codecs works, introducing small amounts of noise. You can hide not so big files, but for cipher communication or video secret marking it's enough! You can manage redundancy of information in film - if you want to compress video with low bitrate, you should increase redundancy, and vice versa. Requirements: VirtualDub 1.4.x or AviSynth 2.x A video file which contain a lot of information, typically contains multiple types of video, for example: * Video File Contains Image (V4L1, WebM) * Video File Contains Audio (V4L2) * Video File Contains Subtitles (SSA, VC-1) * Video File Contains Games (OGG) * Video File Contains Game Graphics (EXR) * Video File Contains Navigation (VP9) In case of multiple video files in one video file, it's possible to mix videos into the same video file. That's the problem, with the program VideoHide, you can hide or show video files. VideoHide Features: Easy to use Runs on Windows, Mac OS X, Linux Runs on Virtualbox, VMware, VirtualPC, ESX Works with all video editing software VideoHide (Free) is the all in one video hiding software to hide and show video files. You can hide and display your entire hard drive (C:, D:, etc.) or folder (F:, G:, etc.) or only specific files (Movies, Music, Pictures, etc.) inside video files. The result is a completely different video file without the original video file. In this way, you can mix videos, by using video file hiding software. This is useful for instance when you want to use a video for e.g. demo purposes, but you don't want to show the original video file in your demo video, so the video file hiding software is perfect for that. In this way, you can mix audio files (mp3, ogg, etc.) with video, and audio files with video. You can also mix audio/video (with for example an mp3 and an ogg file), audio/audio (with for example an mp3 and a mp3),

Include image to one of video frames and save keymacro! Difficulty: Beginner File: Video Codec Manager is an all-in-one solution to convert video in CDR, VCD, MPEG, AVI, WMV, 3GP, FLV, H.264, MP4, 3GPP2, DivX, XviD, RealMedia, MPEG-1, MPEG-2, and Theora. You can extract audio, cut scenes, and change resolution and compression ratio easily. In addition, you can use the effects of DVD video, Black Screen, Reverse, Slow, Back, and White. And the most important function is that you can save the changes you want to the file you want. You can also apply the filters such as Flip, Grayscale, Invert, Rotation, Distortion, Rotate and Crop. Key Features: A. Get all your popular video from CDR, VCD, MPEG, AVI, WMV, 3GP, FLV, H.264, MP4, 3GPP2, DivX, XviD, RealMedia, MPEG-1, MPEG-2, and Theora. B. Extracted the audio and movie from source video. C. Black Screen, Reverse, Slow, Back, White, DVD Video, and Flip. D. You can save any changes you want to video. E. Apply the effects such as Grayscale, Invert, Rotation, Distortion, Rotation and Crop. F. With subtitle, you can change subtitle position and font. G. With mask, you can hide some information such as logo, copyright, border, logo, text, and picture from the video. H. Re-encoding video using H.264, MP4, 3GPP2, DivX, XviD, RealMedia, MPEG-1, MPEG-2, and Theora, so that video compression is 30% better than AVCHD and it is compatible with Windows Media Player. License: Freeware FSVideoMux is a program that reads any video file from an avi, dv, ogg, wma, avs, mpeg, mpeg-4, h264, xvid, 77a5ca646e

What's New In MSU Stego Video VirtualDub Video Plugin?

MSU Stego is a video steganography program that can hide information in a video. You can hide data in video, even if the video was compressed by another program, or if the original video was compressed before. When you hide data in video you can mark with a special symbol, and it can be recovered by other programs (of course only if they understand that symbol). This software is freeware! MSU Stego is designed for an average computer user. Software does not need any special features. MSU Stego virtualvideo plugin has been developed by Mony MSU program. MSU Stego Video plugin is compatible with: - VirtualDub - Videop - Virtualdub Open Source - Virtualdub Pro - AviSynth What's New in This Release: Bugs were fixed MSU Stego Video VirtualDub Video plugin - Free software - More Software like this... Freeware is not supported by Microsoft Corporation. MonsuMSUStego is a program that can hide information in a video. The program works with files like MP4, AVI, XVID, MPEG4, H.264, WMV, DV, 3GP, MPG, and others. MonsuMSUStego's encoder can hide information even if the original video was compressed by another program, or if the original video was compressed before. It also works with encrypted and compressed files, so you can hide data in the cipher and decode it later. Freeware is not supported by Microsoft Corporation. MSU Stego Video VirtualDub Video plugin - Free software - More Software like this... MSU Stego Video VirtualDub Video plugin - Free software - More Software like this... 3D Stego Video StegoVideo is a non-linear video steganography program that can hide information in any video. Information that you hide can be recovered even if video is compressed by another program! Your secret can be marked by a special symbol, and it can be recovered by another programs (of course only if they understand that symbol). This software is freeware! 3D StegoVideo is designed for an average computer user. Software does not need any special features. 3D StegoVideo virtualvideo plugin has been developed by Mony MSU program. 3D StegoVideo is compatible with: - VirtualDub - Videop - Virtualdub Open Source - Virtualdub Pro - AviSynth Requirements: - VirtualDub 1.4.x or AviSynth 2.x What's New in This Release: Bugs were fixed MSU Stego Video VirtualDub Video plugin - Free software - More Software like

Minimum: OS: Windows 7 or Windows 8.1 (64-bit) Processor: Intel Core i3 (Duo) or AMD Phenom II x4 955 (Duo) Memory: 4 GB RAM Graphics: AMD Radeon HD7770 or Nvidia Geforce GTX560 (2GB VRAM) DirectX: Version 11 Version 10 Network: Broadband Internet
