Keysort is a utility which automates the process of renaming hundreds of Microsoft Office document. There are many, many requirements to put in each of these files and Keysort allows for you to put all of them into 1 place. Currently, it supports.docx,.xlsx,.pptx and.odt files. It has NO SUPPORT for.txt files. If the user needs to convert.txt files, this tool can be used to do that

too. Keymacro Core features of the program: A drag and drop interface allows you to simply select a folder full of Microsoft Office documents and click "Process". A single button will open a list of your document with a single press. The program has built in error check for incorrect Office documents to help prevent errors. The program has a user friendly interface, and allows the user to change many of the settings. The program has a setting to provide feedback when the files have been finished. Many, many options to select which files to convert. Built in file protection to make sure you are saving your correct Office documents. Ability to add in a password when a user needs to open a document in Office. The

user can specify a custom program to open each document. Does not work in Windows 98. How to Use Keymacro The user just select where the files are located and then press the process button to begin. The program will guide you through the process and will ask you a few questions along the way. The program has many settings, and allows the user to adjust many of them if they need. After the program is done, the user will have a folder with all their finished files named correctly. The user can open them with any Office program and they will look like they did when they came from the computer. WHY IS THE PROGRAM NEW? Keymacro is new because it is a good alternative to Macro Automator,

and is a simpler application.

WHERE CAN THE

PROGRAM BE USED? It is

designed to be used with

Microsoft Office. In short, it

will run on any Windows XP

system, and will work on

Windows 2000 and Windows

XP (although it may be slower).

It will not work on Windows 98,

Windows ME, Windows NT, or

Windows 2000 operating

systems. If you have Windows

Vista or newer, it will not work

on those systems. HOW DO I

Grooveshark is a small application designed to provide users quick access to the Grooveshark website and listen to their favorite songs online. It can be seamlessly figured out, even by users with less or no experience in such tools. This is a portable piece of kit, so installing Grooveshark is not necessary. You can simply extract the program files to any location on the hard drive and directly run the executable file. Otherwise, you can copy Grooveshark to a USB flash drive or similar storage unit, and run it on any computer with an active Internet connection. This way, you may keep Grooveshark in your pocket whenever you're on the move.

What's more important is that Windows Registry does not receive new entries (minimizing the risk of system errors), and no files are left behind on the hard drive after program removal. The interface of the tool is represented by a standard window which directs you to the Grooveshark website, so you can navigate the media player's features in the same manner as if you were using a web browser. In other words, you can log in with your Grooveshark account, locate the songs you want to listen to, and add them to your playlist by using the "drag and drop" method. As far as media player functions go, you can shuffle or loop songs, as well as share them on social networks. Furthermore, it is possible to

select stations by genre, view the community's activity, play the most popular tracks at the moment, use a search function and to change the interface language. Several application settings are available; for instance, you may specify the crossfade duration or disable keyboard shortcuts and email notifications. The straightforward application runs on a very high amount of CPU and system memory, and has a good response time. No error dialogs have been shown in our testing and the tool did not hang or crash; we have not experienced any issues. To sum it up, Grooveshark delivers a quick solution to playing songs on the Grooveshark website.
