Deep in the lost valley, a strange wind sweeps across the mountain tops. From afar, a thin-shaded girl with a coarse voice utters a few unfamiliar words. She tells us the beautiful tale of an honest, naive, and courageous young man who is nearly alone in the world. A young man who thought he could live a life free from stress and worry. But his wishes lead him on an unexpected journey to the clouds. Unfortunately, he comes face to face with enemies who are bent on controlling every aspect of his life. He has to make a choice. Shall he or shall he not participate in a series of events that will change his life forever? The soundtrack by MicAmic tells the story of a strange adventure. Our hero must struggle to unveil the mysteries behind the clouds. MicAmic is composed of singer/songwriter Hossan Aydin, and Keyboardist Martin Márquez. This music was recorded at SoundBox Studios in Bilbao, Spain. Thanks you very much in advance for listening to the soundtrack and supporting us. I wanted to create a game in which progression and enjoyable gameplay were unified. This game has no core gameplay of any particular kind. I wanted to enjoy every single level without thinking that there was any particular core gameplay. ☐Why did I create this game? This game might be just a cute, silly game that I can't play at work. However, I hope that you will play this game for hours and hours while being challenged, even though you won't go far in the game. If you enjoy this game, please let me know! ☐Replayability: Many games have replayability. If I were to create a game that had no replayability whatsoever, it would be boring. However, in this game, I added many replayability elements, such as reinforcements, and in-game events. Therefore, I hope that you can enjoy this game for a long time. ☐All updates: Please visit the following site to check for updates on the game. ☐Contact: Please visit the following site to check for support on the game. The game file (dmg) can be downloaded from this site. Thank you for playing this game and for your support! I sincerely hope that you enjoy this game! #seikoohkawa#cubes#GameMaker#Game Song: "Hm.."
