These include, but are not limited to, AutoCAD Architecture (for architectural design); AutoCAD Electrical (for electrical design); AutoCAD Mechanical (for mechanical design); AutoCAD Electrical and MEP (for electrical and mechanical design combined); AutoCAD Computer Aided Drafting (for structural and facility design); AutoCAD 360 (for interior and exterior design); AutoCAD Plant 3D (for design of mechanical, electrical and plumbing systems for plants); AutoCAD Graphics (for archiving images); AutoCAD Graphics Suites (for 3D rendering and production) and CADMash (for combining multiple drawing files to produce a single unified 3D drawing). A number of these applications have received various awards in the product categories related to their intended use. AutoCAD Architecture is a 3D CAD application for designers, engineers and facility managers. It is mainly used for architecture, structural, and MEP (electrical, mechanical and plumbing) design. Although it is most often used by architects and structural engineers, it also has a significant market share in the electrical, mechanical, and plumbing (EM&P) design industry. AutoCAD Architecture comprises four modules, including: Single Family Design (for residential design) Masterplanning (for complex building design) Multifamily Design (for apartment building design) Industrial Design (for multi-site design) AutoCAD Architectural software allows users to build a house, an office, or any other complex structure of their choice. Using a combination of design tools, the AutoCAD Architectural software allows users to model space, place the furniture, layout rooms, and select materials, finishes and colors to be used. Examples of other AutoCAD software applications include: AutoCAD Electrical AutoCAD Mechanical AutoCAD Plant AutoCAD 360 AutoCAD Plant 3D AutoCAD Graphics AutoCAD Graphics Suite AutoCAD Graphics Suites AutoCAD Structural AutoCAD Civil 3D AutoCAD Mechanical (formerly PowerPC Autodesk) is a 3D CAD application developed and marketed by Autodesk. CADML, or CadScript, is a scripting language used by AutoCAD and Autodesk Inventor for object definition, placing objects, and other drawing processes. AutoCAD/R includes the following color templates: Text colors Line colors Material colors Text line colors Text material colors Objects colors Shapes colors Solid colors Lines and shapes Features In 2019, AutoCAD introduced three new features: CADML support for placing and routing with any shape A new rendering engine that allows for the display of 3D objects on 2D drawings. A better user interface, including multi-touch support, trackpad support, and improved accessibility features. In April 2019, Microsoft released its new mobile operating system, Windows 10X, which includes support for the AutoCAD application. Computer hardware requirements By default, AutoCAD needs an AMD-compatible x86-compatible 64-bit Windows 7 (Service Pack 1) computer or later to operate, but also can be used on a Windows 10 PC. AutoCAD LT is available for both Windows and Linux. Mac computers can use the latest version of macOS (10.13+) (or use the latest version of Mac OS X 10.6+) and run AutoCAD. AutoCAD support for iPad and iPhone has also been available since AutoCAD 2009. AutoCAD 2017 on Windows also runs on 64-bit Windows 8.1 and Windows 10. AutoCAD 2010 and earlier does not support 64-bit versions of Windows operating system. File formats DXF (Drawing Interchange Format) is AutoCAD's native file format. AutoCAD can open and export most other drawing file formats, including DWG (AutoCAD Drawing), TEC (AutoCAD Technical Exchange Format), VDA (VDA CAD), SLD (AutoCAD Structure Definition Language) and STL (AutoCAD Structure Language). AutoCAD 2000 introduced the FFF and GFF (File Format for Interchange, File Format for Graphics) formats. AutoCAD 2004 introduced the DXFOPEN format (AutoCAD Open Office Format), which is very similar to DXF but with backwards compatibility for files saved in earlier versions of AutoCAD. A version of DXF 2.4 is also supported by AutoCAD LT (AutoCAD's version of the Windows-based AutoLISP environment used for writing code ca3bfb1094
