Developed and marketed by Autodesk, AutoCAD was first released in December 1982 as a desktop app running on microcomputers with internal graphics controllers. At that time, the most important specification for CAD was the ability to deliver a "metric and true" (i.e. not the standard engineering 1:2000 scale) representation of the drawings, and the ability to run in screen space. The first AutoCAD to meet those requirements was released in 1982. At the time, only engineers and architects needed a detailed drawing package with extensive AutoCAD "Metric and True" support. Other applications, like the one shown in the above slide, were more useful to builders, inspectors and other less technically oriented people. So the search returns a value, then the box indicates that value. When there's no data, then the search box is empty. I found this answer, and it works. I just can't figure out how to add the border. I tried messing with the CSS, but I have no idea what I'm doing. Can someone help?
