I can't find anything on how to create a "session" in the Google App Engine. I'm building a site where users can log in and change some personal preferences. It's a very simple site and I want to avoid getting users to register. A: You shouldn't need to worry about sessions on the GAE. The default AppEngine app servers don't store sessions by default. (In fact, there is a certain amount of safety built in to make sure they can't be used for a long time.) You should use a session
