Sports Desmond Lewis, known affectionately as D-Lew, is a good-natured and talented computer programmer, a committed sports enthusiast, a good plumber and lately a pro basketball player. He's a true Renaissance man. Sports The early signs are promising for the Halifax Regional Athletic Association's inaugural show in the Canadian Championship. The tryouts for women's soccer were a success, and while the association has already rebooked tryouts for next year, a few top players are already in contract negotiations with clubs. The association is optimistic that Nova Scotians will be excited to get behind their local teams. Sports The 38-year-old has been plagued by knee problems, including the dreaded torn-meniscus. Carter was asked to make a decision on the potential for his career, but that process took longer than expected. Sports The city of Halifax is one of the best in the world at this, and it's a sports city, and we make our own sports. We all grow up watching sports, particularly in the summer. Sports The Halifax Airport Authority board has approved a plan that will see the moving of the airport's terminal from the city's east end to the current site of the Halifax Stanfield International Airport's passenger terminals. The above concept has been referenced on this site from time to time, usually in reference to Vince Vaughn and Owen Wilson, who once held hands in a car and walked into a bar. To me, this is just hilarious. The old guy walks into a bar to get a drink, the bar is packed with beautiful, nerdy girls, and the old guy is like, "Hello girls!" The obvious response from the girls would be, "How are you doing?" And the old guy would respond with, "Oh, I'm good! I'm a doctor!" No, the idea of a doctor entering a bar to buy a drink has no currency. Get it? Ha-ha. However, I have seen this reference crop up on Reddit from time to time, and now I have a plausible reason for why I have never seen anything like this before. Please do a little research on your own to verify that this is actually true, but allow me to supply my interpretation of the Reddit thread that originates this reference:
