What's new in Fifa 22:

- **Score with Style: Improve your ability to score and rack up goals on the pitch with new ball options, including**

positioning, speed and movement and by keeping the ball. When dribbling with the new skill pass, small directional changes add force to shots, and possession is more fluid on crosses and through balls than it has ever been.

- **Evolution:** Differentiate players with customizable content, new training techniques, new outfakes, new ad-libs, new jumps and celebrations, and improved passes. Plus, the game has been updated to intelligently target “lazy” players.
- **New Take Control:** Take on tasks around the pitch with new Take Control action. Picking up the ball is now a combination of learned effort, and expertly calculated precision, to knock it down and get into position for new dribbling tricks. Speed up tackles as you hit the ground, and sprint past strikers who can’t block you.
- **Dual Motion Tech:** All action plays, ball touches, tackles and headers, and all typical behaviours of your player can be affected by the new motion sensing technology with every step, tackle and pass.
- **New Ball Physics:** Physically feel the ball and get under its skin. Feel new and unpredictable shots through the goalkeeper as pressure and touches compress the ball, or see how the unique gameplay of the PlayStation 4 and Xbox One controls allows for balls to get stuck under your feet, and also be frozen on the line of the penalty area.
- **Free Kick Animation:** See how to configure every free kick and combination freely, including new spins and lobs off the wall.
- **New Training Tools:** Rejuvenate your player on the pitch or gym floor with new physical and mental strengthening training tools.
