Players with HyperMotion™ will experience the feeling of movement like never before, featuring real-time ball control with pinpoint accuracy and control of every pass, shot, tackle and movement. FIFA 22 introduces "Match Day Moments" where the roles of the teams are reversed and managers come to life as they manage their squad before a match from anywhere in the stadium, with multiple camera angles enabling players to be observed from many different angles at once. For the first time in the series, managers and players will be able to walk around the pitch in 3D using the new player info screen with up to three players on-screen at once and receive detailed stats at the touch of a button. With FIFA 20, players could take on defenders and ball-carriers with the physicality of Real Player Motion during dribble moves; tackle, grapple and head the ball like never before with Player Impact AI, and be playful in all the fun situations of the game with RTP. FIFA 22 delivers on that promise, with a wealth of new gameplay innovations and innovations for the series, all delivered under the banner of Next-Gen. "We are confident that with the coming release of FIFA 22, we will deliver the most realistic football experience available," said Executive Vice President of Football Rene Fasel. "In addition to being the most powerful football video game in the world, FIFA 22 will be the benchmark for realism in sports games. We are proud to once again team up with our partners at EA SPORTS, to take the FIFA series to the next level." FIFA 22 introduces "PlayStation VR," where the virtual soccer field becomes the ultimate playground for the senses, with players feeling like they're on the pitch as they engage in the most realistic soccer experience yet. Players will be able to score, receive, and control the ball with new ball physics, receive passes with real player models, dodge defenders with the new Player Impact AI, tackle, grapple and head the ball, and experience Counter Attack awareness. Players can now dive and even fake being tackled, receive passes from other players, dribble around defenders, and perform dangerous tricks and feints, like a half-turn, spin, and drop to move the ball into position. The game engine has been re-built from the ground up in order to deliver truly impressive visuals, while with HyperMotion™, players will feel the next-generation motion of FIFA
