For example, "Bob is an expert on X.", where X is a specific topic and Bob is a specific name. An example of this I have is if I have heard about a business that has an unusual name but actually does not exist, and I want to say that I'm an expert on that business. A: An expert on the business called the Unusual Business Name is a bit long-winded, but perfectly idiomatic. A Model Courtesan's Outlook A Model Courtesan's Outlook is a 1958 film directed by Norman Taurog. It was released as A Courtesan's Introduction in 1959. It was one of a wave of science fiction films inspired by The Day the Earth Stood Still, released in October of that year. Premise The title is misleading; the film is a full-length documentary masquerading as a science fiction adventure. It follows a reporter (portrayed by Lyle Talbot, who appeared in The Day the Earth Stood Still) as he attempts to interview a reputed courtesan (Patricia Medina) who specializes in teaching the art of "hypnotic seduction." She tells him that there is some kind of danger threatening Earth. References External links A Model Courtesan's Outlook at IMDb Category:1958
