Gear on the same level as the champions of League of Legends and DotA: All Gamers.Broadway Records Broadway Records was a British record label founded in 1947 and dissolved in 1979. It was the first of the independent label boom of the late 1960s, when dozens of new labels began to flourish. The label specialised in British music and covered the fields of comedy, folk, folk rock, jazz and blues. The label's catalogue included recordings by: Alan Bennett Flowers in the Rain by Ruth Cook Bert Lloyd Doris Duke Paddy Flanagan Keef Hartley Bernadette O'Farrell Betty Marsden Andy Cutting The Last Post References Category:British record labels Category:Folk record labels $000-5 \mu \mathrm{~m}$. Because the water is lighter than the pigment, it reflects or scatters light. By utilizing the refractive properties of the translucent particles, a light scattering effect is achieved. Three layer system The three layer system is not as widely available as the two layer system, but is often used for applications where fine control of scattering is needed. The three layer system consists of a scattering layer sandwiched between a transparent cover and a transparent substrate. The layer of pigment or scattering particle is usually formed with a hot melt adhesive or adhesive layer. The benefits of a three layer system include the ability to create a display with vivid colors without the use of light scattering particles. The clarity and luminosity of the display is also improved over the two layer system since the three layer system can hold the lightscattering particles in position. PVA-based nanocomposite microspheres Polyvinyl alcohol (PVA) is a copolymer of vinyl acetate and vinyl alcohol. It is usually used in an acetate ester copolymer, which has a good balance of mechanical and chemical properties. When the PVA is partially hydrolyzed, it can form a high refractive index and photo-defective layer. PVA has been found to be a promising substance for scattering. PVA is
