I need a table in the last row

of a page. My problem is that the table always goes to the next line and then stops. I am using a for-loop for the cells and adding empty cells between. Then I fill the cells with data. In some cases the table goes to the next line, and in some other cases it just stops and I get a white empty space. Can someone help me fix this? What I have done till now: for (Cell cell : (List)cellRange) { Cell cell2 = row.createCell(0); cell2.setCellValue(null); cell2.setCellStyle(cell.getCellStyle()); // Creates an empty cell in second row Cell cell3 = row.createCell(1); cell3.setCellValue(null); cellRange.setCell(0, 0, cell2); cellRange.setCell(0, 1, cell3); emptyCells.add(cell3.format());
