OPTIMAL FANTASY RPG GENIUS is thrilled to bring you the first review for Elden Ring Activation Code. Click here for our review (in English). THE NEXT GENERATION. Elden Ring is the name of a title being developed by Remaining Light Entertainment, a game company that began operation in September of last year. ELDEN RING is considered to be a new title from Remaining Light Entertainment and an "improved version" of their old title "The Legend of the Legendary Heroes". The game features a new cast, improved story, and new battle system. ELDEN RING is an innovative fantasy action RPG. The story takes place in the lands between two kingdoms. At the time of its development, the title was in its early development stages and could not be approved by the Famicom Legend series developer, Nintendo. However, the title was partially approved by the developer due to the positive response of Nintendo's staff. ELDEN RING was partially rewritten according to the suggestions of Nintendo, but the main story and the battle system are not being changed. The game is being developed for the Super Famicom (Super NES). ELDEN RING will be released for the Super Famicom in Japan in Spring of this year. THE NEW FANTASY ACTION RPG. Rise, Tarnished, and be guided by grace to brandish the power of the Elden Ring and become an Elden Lord in the Lands Between. Brand joins the 2 in their quest, and brings them to the Forsaken Shrine. While looking for clues to solve the mystery of the area, Elfric and Brand encounter a being named "Melkor". While the 3 of them are investigating the area, Dorian and Elfric are separated from Brand. Brand tries to find Elfric and Dorian. After a few days the 2 found Dorian. He tells Elfric that he is being tracked by 3 people. What these 3 people are, and how Dorian knew about them, he does not explain. What's new in Elden Ring:

This game does not require the purchase of additional CGs in order to run. [What is the difference between "Online Multiplayer" and the "Asynchronous Online"?] - The "Online Multiplayer" lets you create your own customized online characters and confront opponents from all over the world through a randomized server. - The "Asynchronous Online" is an online element for social games; it doesn't offer any unique elements compared with the normal "Singleplayer Online." You can play any of the other online games with your Asynchronous Online character while your H.E.R.T. works.

[What is the difference between "Manual" and "Automatic"?] - "Manual" is a method that allows you to control the rotation of your character's helmet in relation to your avatar. - "Automatic" is a method where your character's motion is automatically controlled. In other words, once you've entered a particular location in the story, H.E.R.T. automatically rotates your character's helmet until your next movement is assigned. This also applies to the "Automatic Exploration" method, which controls your characters exploration when the player character goes out of the map.
