of the C language I'm doing a project to understand C language. I would like to know how the heap of the C language is divided. Is there any part dedicated to this? What happens if I allocate some memory using `realloc()` and allocate some more memory? Thanks

A: I'm doing a project to understand C language Well, this is a tough job, but I'd start you off with any of the in-depth C Primer books. Those books cover the topics in depth, and in addition, they cover things like C pointers, structures, arrays, function calls, etc. When you say "how the heap is divided", you really mean "in what parts of the code, or what memory

are the data structures and function parameters located". And depending on what you're doing, you may want to look at the block function, which allows you to explicitly define a memory zone, as you do so with malloc and realloc. Indeed, just glancing at the code, you'll see that these functions allocate blocks that look like data structures, although they could be anything at all. of the Justice Department. \*
