## Reflexive Arcade Games - Collector's Edition DVD Game Download REPACK

Another high-quality game worth your time, Wings of Megaira is an interesting game that successfully blends classic arcade gameplay with strategy. The player must construct a half-pipe out of 50 different parts. Through clever use of pneumatic tubes, the player can move parts from one location to another, assembling and manipulating them into a sloped shape. The challenge is that if any one part of the pipe touches the ground during the construction stage, it falls away. The player has to keep moving parts back and forth in order to keep the pipe from falling. The game has different stages with smaller pipes for level advancement, and when the player completes the pipe, it will allow the player to travel through it. The developer was part of the X Game Maker's team at U of C in 2006-2007. Here is their site, and here is the site with their meagaira racer. Word Pads is a new action word game done in Flash with a tropical theme. Similar to games like WEBoggle, except played as a single-player experience, the object of Word Pads is to form English words to score points by clicking on the lily pads in a race against the clock. Words of 3 or more letters are safe, but words of 4 or more letters only score points. The longer the word, the more points it is worth. Letters do not have to be on adjacent pads, and forming words of more than 5 letters creates a golden lily pad that acts as a score multiplier for future words formed with it. Misspell a word or run out of time and you lose a lily pad. The game is over when you run out of lily pads. A high score list provides the challenge of a competitive element.

## Reflexive Arcade Games - Collector's Edition DVD Game Download

last but not least, there is a new game that i just discovered, that is a free download. while it is a puzzle game, it is not a shoot em up, or an action game. it is a little reminiscent of the game cornutopia, but it is more like a game of tetris with a story. i think the game is part of a series of games called the mini game collection, and is named "mibot - the robot on the moon". while you will have to wait a few weeks to play this game, it is worth a try. in a way, the indie games really are a new wave in game development, and they are part of a broad field of game development that include the large and small studios. i think the ability to create a game without having to deal with the huge budgets and large numbers of employees that large game developers require will be a beneficial development for the game industry. as more and more of these small game developers begin to work on their own, they will be able to find the resources they need to create more and more games. but, i also have to note that the rapid decline of the cd, and the rise of the dvd, has hurt indies in a way. with the ability to cost less to produce, and produce more games, the number of indie games has actually risen. but, the market for the indie games has not really expanded significantly, and the release of the indie games has become more and more sporadic. this means that the indie games, which i am sure are fun to play, are no longer available when they were released, and by the time they are, they are no longer available for download. i think the best solution is for the indies to come together and for a site to be set up that would make it easy for indie games to be found. the big game publishers could support that, and possibly the academic world as well. even better would be if the indies, and the game reviewers could come together to work on promoting indie games that are truly innovative and fun to play. i think the big game publishers should be supporting that too, since most of the good games are produced by small developers and are available only over the web. but, i also think the indie games are a great thing, and deserve to have their games and their players more easily found. 5ec8ef588b
