Embroidery Studio e3.5 gives you all this, along with added features that are particularly useful in design and development. Digitizers and designers can now export full-color projects as JPG with the optional ICC profiles embedded in the file. And you can now use a simple drag-and-drop function to share designs in the most convenient formats for email and the web. Weve made significant performance improvements when running digitizers on large digitizing jobs. EmbroideryStudio e3.5 also supports a number of new and enhanced features. Now you can add 2-color fonts to Digitize and Export projects. Simple enhancements are made to the generation of the document and project designs for stitching so that they are easier to view and print. In the BackColor section, a simple selection tool is used to provide you with the ability to quickly and easily color the selected text. An automatic rotate link is used to automatically rotate the digitized text. In addition to the existing sophisticated Digitizing, Outputting, and Inputting choices, the new Options dialog box provides you with the ability to display the fonts used in the project. With this information, you can easily change or rearrange the fonts used in a project. And in the Font section, there is a series of new settings that can be adjusted to adjust the font size and output. In addition to the enhancements to the Digitizing and Outputting tools, Embroidery Studio e3.5 also supports new features for digitizing with the Off-the-Shelf, Premium, and Authorized OEM digitizers. embroidery digitizing software for professional digitizers, embroidery shops, industry trainers and educators, and apparel decorators. With new technical and creative stitching effects, even faster digitizing and over 200 professional embroidery fonts, you can digitize more creative advanced designs quickly with full professional control.
