## Stk412 750 Datasheet 16.pdf HOT!

we have a strict quality-control policy for all the stk412-490 parts to make sure that we offer the best possible solutions to our customers and we always keep working to make our delivery times even quicker. if you ever have any issues, contact us straight away and we will do our best to help you. the makers of this product are SANYO, a manufacturer of semiconductor devices. the stk412-490 is categorized under the stk412 heading in our database and is meant for audio power amplification. the amplifier is suitable for use in audio applications, such as compact disk players, cassette players, audio tape players, car stereos and the like. a narrow band pass filter was added to the configuration circuit to remove ripple of the output power transistor. the low pass filter cutoff frequency is in the range of 15 Hz to 300 Hz. the amplifier is also suitable for stereo speaker amplifiers. Two major characteristics of the STK412-000 series are linearity and efficiency. The linearity of the STK412 series is extremely high, so the low level sound quality of the STK412 series is superb. The efficiency of the STK412 series is high compared to that of other power amplifier ICs, and is around 60%. The STK412 series, with a power-up time of less than 10 ms, allows time-critical

---

audio (such as speech, siren, or alarm tones), and can handle a large current. The benefits of the STK412-000 series are the high efficiency and rapid power-up. The two major characteristics of the STK412-000 series are linearity and efficiency. The linearity of the STK412 series is extremely high, so the low level sound quality of the STK412 series is superb. The efficiency of the STK412 series is high compared to that of other power amplifier ICs, and is around 60%. The STK412 series, with a power-up time of less than 10 ms, allows time-critical audio (such as speech, siren, or alarm tones), and can handle a large current. The benefits of the STK412-000 series are the high efficiency and rapid power-up.

### **Stk412 750 Datasheet 16.pdf**

The STK412-000, STK412-150 series are class H audio power amplifier hybrid ICs that feature a built-in shift power supply circuit. These ICs provide high efficiency audio power amplification by controlling (switching) the supply voltage supplied to the power transistors according to the detected level of the input audio signal. The STK412-000 series are class H audio power amplifier hybrid ICs that feature a built-in shift power supply circuit. These ICs provide high efficiency audio power amplification by controlling (switching) the supply voltage supplied to the power transistors according to the detected level of the input audio signal.
