This is a tool that helps you isolate and accentuate certain colors in your photo or video and use them to guide your creative process. For example, it can be used to draw attention to a person's face in a picture, or to create a custom emoji like your favorite character or symbol. It's also great for using a photo or video as a reference to tell your own story. When you use the Quick Mask tool, you no longer need the Masking Pads that usually come with Photoshop. You can adjust your mask, but it will remain inside the selection area. Once you are happy with it, you can press Enter or the space bar to accept it.
