

## SafariHistoryView For Windows

[Download](#)

## SafariHistoryView Crack+ Free License Key X64

Automatically check out your Safari web history, including URL, title, date and time, and index. Shows or hides grid lines in the main panel. Manages table columns to show or hide desired data. Simple interface. Runs on portable devices. Exports the entire history with all visited websites, or only the selected columns. Saves information into the history.plist file. Cleans the history.plist file. Remembers the location of the history.plist file. Handles keyboard hotkeys. Cannot open Safari web pages. Exports the content of the history.plist file to an HTML file. Configures the following settings: Location of the PLIST file. Size of the history window. If the History window is active, the URL, date, time, and visit count are displayed. The URL is presented in a large window. The window provides links to popular web pages. Index column. SafariHistoryView Screenshots: SafariHistoryView - Google Chrome History Viewer SafariHistoryView - Internet Explorer History Viewer SafariHistoryView - Firefox History Viewer SafariHistoryView - Opera History Viewer SafariHistoryView - Wikipedia History Viewer SafariHistoryView - My Web History Viewer SafariHistoryView is a lightweight software application whose purpose is to help you automatically check out your Safari web history. The tool is able to read the information from 'history.plist' files and displays it in a simple table. Portable running mode This is a portable program which can be stored on USB flash drives or other devices. You may run it without administrative privileges on the target computer. Gaining access to the GUI requires opening the executable file because you do not have to follow the steps included in an installation process. What's more, it does not store entries in your Windows registry so you can get rid of it using a quick deletion task. Simple looks Decoding the application's interface can be done in a short amount of time because it looks highly intuitive. SafariHistoryView automatically reads and displays the content of your web history, provided that you have Safari installed on your system; otherwise, it prompts you to manually specify the PLIST file. What's more, it offers information about the URL, title, date and time
