A: Your case is almost impossible to fix as the internal dialog is totally out of control. My suggestion is, you need to reset the flash drive and install the new version of Adobe Flash from the link: The present invention relates to a polymer electrolyte fuel cell, more particularly, to a process for producing a polymer electrolyte membrane for use in polymer electrolyte fuel cells, as well as a polymer electrolyte fuel cell using the same. In recent years, there have been many researches and developments on polymer electrolyte fuel cells. One of the research objectives is to improve the chemical stability of the polymer electrolyte membrane which is the main component of the polymer electrolyte fuel cell. In recent years, there have been many proposals for improved polymer electrolyte membranes. The development of polymer electrolyte membranes is under way based on the new concepts of electrochemistry, such as charge transfer, polarity change and so on. As a conventional polymer electrolyte membrane, there is, for example, a polymer membrane made by incorporating perfluorocarbon sulfonic acid into a polytetrafluoroethylene membrane, and having a sulfonic acid content of 5 to 20% by weight. This type of polymer electrolyte membrane is described in, for example, "Polymer Electr. Chem. Eng. Vol. 15, No. 5, May 1985, pp. 464-473". However, when this polymer electrolyte membrane is used as a solid polymer electrolyte membrane, there is a problem in that the reaction between the anode and the cathode in a polymer electrolyte fuel cell are not sufficiently progressed because of the restriction of ion conduction by the polymer electrolyte membrane. As a technique for solving this problem, it is considered to form pores in a polymer electrolyte membrane by using a porous material such as carbon particles as a support of the polymer electrolyte membrane. However, according to this technique, it is very difficult to control the shape of the pores. Search This Blog Subscribe to this blog Follow by Email #LOVESHIPPING We had a fantastic weekend. It was both liberating and wonderful. I think I was too mentally/emotionally exhausted to write my blog on Friday and I had so many lovely things to talk about but I will try to recap. There were new discoveries, new experiences, new friend and old friends, lots of laughs, and a great meal. We arrived home and were grateful to see a friendly face. Or was it a friendly face? Oh, it was definitely so. An employee at the grocery store was looking at me like I was really weird. I guess there is one woman who eats a lot of weird food and didn't want to stand there and chat for a little while. No. She just wanted to look at me. f988f36e3a
